PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience in AWS and Microsoft Azure, Kubernetes, Docker, and CI/CD automation. Skilled in building scalable cloud infrastructure, deploying containerized applications, and implementing Infrastructure as Code (IaC) using Terraform. Experienced in monitoring, cost optimization, and high-availability systems. Seeking to contribute to reliable and efficient DevOps workflows.

TECHNICAL SKILLS

Cloud (AWS)	EC2, S3, RDS, IAM, VPC, CloudWatch, SNS
Cloud (Azure)	Virtual Machines, Azure SQL Database, Storage Accounts
CI/CD	Jenkins, GitHub Actions, ArgoCD
Containers	Docker, Kubernetes (EKS), Helm
Infrastructure	Terraform (Infrastructure as Code), Nginx, Apache
Monitoring	AWS CloudWatch, System Monitoring
Databases	MySQL, AWS RDS
Scripting	Bash
Version Control	Git, GitHub, Bitbucket
Networking	Security Groups, Load Balancers, DNS, IAM Roles

EXPERIENCE

Junior DevOps Engineer

Sep 2025 - Present

2Cloud, Mananthavady, Wayanad

- Managed AWS infrastructure (EC2, S3, RDS, IAM, VPC) ensuring high availability and scalability.
- Built and maintained CI/CD pipelines using Jenkins and Git, improving deployment efficiency.
- Deployed Magento applications using Docker and Docker Compose in production environments.
- Supported Kubernetes (EKS) deployments for container orchestration and microservices architecture.
- Automated MySQL backup, restore, and migration processes ensuring data reliability.
- Monitored systems using AWS CloudWatch, reducing downtime and improving system performance.

DevOps Intern

May 2025 - Sep 2025

BridgeSkill, Mananthavady, Wayanad

- Worked with AWS services including EC2, S3, and IAM for cloud-based deployments.
- Developed CI/CD pipelines using Jenkins and Git for automated build and deployment.
- Deployed applications using Docker and Docker Compose.
- Gained hands-on experience with Kubernetes Pods and deployments.
- Managed MySQL database backup and restore operations.
- Monitored server performance using CloudWatch.

PROJECTS

Scalable Magento eCommerce Platform – DevOps Implementation

- Designed and deployed a scalable Magento platform on AWS EKS using Docker and Helm.
- Implemented CI/CD pipelines using Jenkins, GitHub Actions, and ArgoCD.

- Provisioned infrastructure using Terraform for EKS, RDS, and S3 (Infrastructure as Code).
- Integrated CloudWatch monitoring and Slack alerts for real-time incident response.
- Optimized AWS costs by identifying idle resources and applying right-sizing strategies.
- Improved system performance using Cloudflare CDN, Redis, and Varnish achieving 99.9% uptime.

AI Chatbot Deployment – Kubernetes & CI/CD Automation

- Deployed AI chatbot on AWS EKS using Helm for repeatable and scalable deployments.
- Implemented microservices architecture using Kubernetes Deployments, Services, and ConfigMaps.
- Built CI/CD pipelines integrating Docker, Jenkins, and Helm for automated deployments.
- Configured Nginx Ingress and Load Balancer for traffic routing and high availability.
- Ensured security using IAM, RBAC, ECR, and namespace isolation.

Odoo 18 Deployment – Kubernetes Automation

- Provisioned infrastructure using Terraform and AWS EC2.
- Deployed Odoo on Kubernetes (EKS) using Docker and Helm.
- Configured Persistent Volumes (PV/PVC) using AWS EBS.
- Automated CI/CD pipelines for build, deployment, and rollback.

EDUCATION

Bachelor of Computer Applications (BCA)

2022 - 2025

Jamia Hamdard Kannur Campus

ADDITIONAL EXPERIENCE

- Performed OpenSearch upgrade on AWS EKS using blue-green deployment with zero downtime.
- Created and maintained Helm charts for standardized deployments across environments.
- Supported Dev and UAT environments ensuring consistency and stability.
- Monitored Magento order flow and transaction success rate for system reliability.
